STATINTL

MEMORANDUM FOR: Chief, Physical Security Division  
THROUGH : Chief, Information Systems Security Group  
FROM : [REDACTED]  
Security Officer, ODP  
SUBJECT : Removal of Magnetic Media from Headquarters Building

1. A small select group of Computer Scientists in the Office of Data Processing are testing the Delta Data 7000 model series CRT Terminal to determine the capabilities and deficiencies of the equipment. Their efforts are as time permits at the Headquarters Building, but that time is limited. They have been permitted to have a terminal at their homes where they have more free time to conduct the tests.
2. The terminals being tested are used as stand-a-alone systems and only unclassified data is processed. To give continuity in their study, they would like to use the same floppy disk at home and at Headquarters.
3. It is requested that a waiver be granted for the removal of this magnetic media from Agency Buildings during their testing period.
